SOFTWARE DEVELOPING

Motivated and determined individual possessing a wide variety skills, primarily in software developing, along with technical/mechanical fields. Seeking for dynamic and progressive opportunities to learn and develop software projects.

EDUCATION

BSc (Hons) Software Engineering

University of Stirling - RAK

TQUK Level 3 Diploma in Engineering (RQF)

Al Shabaka Technical Institutional Academy - Dubai

International Advanced Subsidiary (12th Std)

Grammar School - Dubai

CERTIFICATIONS

10th Student Research Culloquium on Advances in Engineering & IT

Manipal Academy of Higher Education - 2025

AI powered rubbish collecting robot

3rd place ERC - 2025

Advanced Java: Threads and Concurrency

LinkedIn Learning - 2025

Java Programming

Great Learning - 2025

2D Game Design and Development

Essential Training (Java)

LinkedIn Learnig - 2024

Networking Foundations: Networking Basics

LinkedIn Learning - 2025

6th AUE Student Research Competition Participation

The American University of the Emirates - 2023

Research Article Publication Certification

SSRN product and services - 2021

EXPERIENCE

ValignIT Technologies Private Limited Jul-Aug 2025

Backend Developer Intern: Worked on a Java SpringBoot project implementing business logic and API endpoints. Utilized SQLite for database storage and JPA repositories for CRUD operations.

Quantum Edge Distribution Aug-Sep 2025

Solutions Experience Specialist: Created quotations, database architecture analysis via SQL, tender analysis.

RECENT PROJECTS

Tour Reservation System Web Service - Java Spring Boot, HTML, JS, CSS

Developed a Spring Boot-based tour reservation system that provided RESTful web services to support guest and admin functionalities. Guests could browse tours, make and cancel reservations, and manage bookings with validation to prevent double booking. Admins could create, update, and delete tours and reservations, ensuring efficient resource management. The system used lightweight Java data structures and incorporated date constraints to validate guest stays and prevent overbooking.

Note taking Mobile Application – Kotlin Android Studio

Developed NoteApp, an Android application built with Kotlin in Android Studio, focused on providing a lightweight and intuitive note-taking experience. Implemented core functionalities including creating, viewing, editing, and deleting notes, with a minimalist and modern design for enhanced user usability.

Airport Aircraft Management System - Java (Group Project)

Led a team of five in developing the Stirling Airport Aircraft Management System (SAAMS), a simulated information system to manage aircraft arrivals, unloading, loading, and departures. Designed and implemented features to provide real-time status updates to staff and passengers, regulate aircraft progress through various stages, and facilitate interactions with on-board systems for flight detail transfers. Utilized UML models, including class diagrams, state diagrams, and sequence diagrams, to guide development.

Vroom-UAE - Python Django, React.js

A full-stack web application with a Django REST API backend and React.js frontend, allowing users to search, filter, and compare vehicles based on specs, performance, and emissions. Features include AI-powered recommendations, user reviews, search history, and comparison sharing. Designed for efficiency, scalability, and sustainability insights.

TECHNICAL SKILLS

Java
Python
SQL
PHP
Ocaml
C/C++
HTML
CSS
React
AutoCAD 2D/3D
Microsoft Office
Minitab
Orange
MongoDB
MySQL
SQLite
Spring boot
Django

CORE COMPETENCIES

Team Working
Leadership
Punctuality
Professional
Ethical
Confident
Optimistic
Poised
Time management
Communication
Adaptability

LANGUAGES

English
Urdu
Hindi
Arabic (basic)
Turkish (basic)
Japanese (basic)
